

Assignment 2: Static HTML5 Website

Part One:

- Review lecture slides from Week 3 and 4 (HTML, CSS and Javascript)

Part Two: Your First Static Website:

- Your website should contain three pages (Home, About Me, Contact Me). Each page of your site should have a 3-column layout:

- If you would like to make your site responsive. You are allowed to use CSS Flexbox or the CSS @media style rules to make your pages responsive.
- Do NOT use frameworks like Bootstrap etc.

- Review HTML Layout types discussed in class:
https://www.w3schools.com/html/html_layout.asp and use the suggested chapters from "The Missing Link" e-book listed below.
- **[IMPORTANT]** Please make sure the your source code folders are structured like this:

```
/my_static_website
    home.html
    about_me.html
    contact_me.html
    /images
    /videos
    /css
    /js
```

Note, my_static_website, images, videos, css and js are directories that will hold your website content etc.

- You MUST use the appropriate HTML5 tags to lay the various columns and sections of your website pages. Tags such as <nav>, In the “Nav” section add links to the three pages of your site. The three pages are: Home, About Me, Contact Me
 - <header>, <aside>, <footer> etc.
- On the "Home" page in the “main” column add a <h1> header an introduction message i.e. “Hello World!”
- On the “Home” page in the “main” column add a <p> and put a paragraph or two explaining the classes you are taking this semester and what your favorite class is so far.
- On the "Home" page in the "main" area embed a video in the page using the <video> tag.
- In the “Header” section place a background image that fills the whole space.
- In the “Footer” section place copyright text i.e. Copyright © HelloWord.com.
- On the "Aside" section create an unordered list of 5 of links to your 5 favorite websites.
- On the “About Me” page in the “main” container:
 - Your name at the top of the page as an <h1> heading in your header
 - Add a few paragraphs about yourself to your content container
 - Add a list of hobbies or interest displayed as an HTML unordered list to content
 - Link at least two of your hobbies or interests to websites related to those interests

- On the “Contact Me” page add a basic contact form (it does not need to send information anywhere). The form should include the following:
 - Name text field
 - Subject text field
 - Message text field
 - Submit button
